

By expanding LPFM, it is my fear that local FM stations like K-LOVE will be forced off the the air. In a world where large chain businesses are over-shadowing small local businesses, I feel it is important that broadcasting not be controlled by large, out-of-area sources. Everyone will soon be listening to syndicated programming produced in large cities and will no longer have the local news, events and even local flavor that is so important for an area's identity.

KLOVE provides a way for local organizations to announce and publicize upcoming events at no charge. Regular commercial stations don't.

KLOVE provides 24 hour a day programming that is safe for everyone to hear - even children and teens. - No 7 second delays needed. It is a primary source of Contemporary Christian music. To push stations like Klove off the air is discriminating against Christians.

KLOVE gives an encouraging, positive, uplifting view of the world we live in.

Please consider the consequences before deciding in favor of commerce at the expense of the people.
